

Submitted to Future Grant Support for Forestry  
Submitted on 2023-05-03 12:27:20

Ministerial Foreword - Forestry in Scotland is a sector that we can be justly proud of.

## 1 - Introduction and Rationale for Providing Grant Support for Forestry

1. Do you agree that grant support for forestry should continue to be improved and developed as a discrete scheme within the overall package of land support?

Yes

Please explain your answer in the text box.:

Natural woodland regeneration should also be supported in appropriate circumstances.

2. Are there any changes that would allow for better complementarity between the forestry and agriculture funding options?

Not Answered

Please explain your answer in the text box.:

## 2 - Forests Delivering for Scotland's Climate Change Plan

3. How can the support package for forestry evolve to help tackle the climate emergency, to achieve net zero, and to ensure that our woodlands and forests are resilient to the future climate?

Please explain your answer in the text box.:

4. Private investment through natural capital and carbon schemes can make a valuable contribution to climate change. Do you agree that the grant support mechanism should have more flexibility to maximise the opportunities to blend private and public finance to support woodland creation,

Not Answered

Please explain your answer in the text box.:

5. How could the current funding package be improved to stimulate woodland expansion and better management across a wide range of woodland types, including native and productive woodlands?

Please explain your answer in the text box.:

6. Do you agree that it should be a requirement of grant support that woodlands are managed to ensure that they become more resilient to the impacts of climate change and pests and disease?

Yes

How can the grant scheme support this?:

Careful checking of planting schemes and subsequent periodic inspections.

## 3 - Integrating Woodlands on Farms and Crofts

7. Which of the following measures would help reduce the barriers for crofters and farmers wanting to include woodland as part of their farming business? Please select all that apply.

Knowing where to get reliable advice, Clearer guidance on grant options, Flexibility within options

Are there others not listed above?:

8. Establishing small woodlands can have higher costs. What specific mechanisms would better support small scale woodlands and woodland ownership?

Please explain your answer in the text box.:

## 4 - Forests Delivering for People and Communities

9. How can forestry grants better support an increase in easily accessible, sustainably managed woodlands in urban and peri-urban areas?

Please explain your answer in the text box.:

10. How can grant support for forestry better enable rural communities to realise greater benefits from woodland to support community wealth building?

Please explain your answer in the text box.:

11. How can the forest regulatory and grant processes evolve to provide greater opportunities for communities to be involved in the development of forestry proposals?

Please explain your answer in the text box.:

12. How can the forestry regulatory and grant processes evolve to ensure that there is greater transparency about proposals and the decisions that have been made on them?

Please explain your answer in the text box.:

Access to information about grant applications needs to be much better so that it becomes similar to local authority planning applications. This means that detailed information on proposals is readily available on the SF Public Register of grant applications, and all comments already received are also accessible. This will allow the public and interested NGOs to assess applications quickly and easily. The current arrangements do not allow this.

13. Forestry grants have been used to stimulate rural forestry businesses by providing support with capital costs. Do you agree that this has been an effective measure to stimulate rural business?

Not Answered

a. How could this approach be used to support further forestry businesses?:

b. How could this approach be used to support further skills development?:

14. How could the FGS processes and rules be developed to encourage more companies and organisations to provide training positions within the forestry sector?

Please explain your answer in the text box.:

## 5 - Forests Delivering for Biodiversity and the Environment

15. The primary purpose of FGS is to encourage forestry expansion and sustainable forest management, of which a key benefit is the realisation of environmental benefits. How can future grant support better help to address biodiversity loss in Scotland including the regeneration and expansion of native woodlands?

Please explain your answer in the text box.:

Larger planting schemes should include substantial areas of native broadleaves (or Scots Pine where appropriate). Areas of natural regeneration should be supported where there is likely to be an adequate seed source.

16. Herbivore browsing and damage can have a significant impact on biodiversity loss and restrict regeneration. How could forestry grant support mechanisms evolve to ensure effective management of deer populations at:

Landscape scale?:

Sadly, there is probably no alternative to long-term culling of deer. [Reintroducing the Lynx would help, particularly with Roe Deer.]

Small scale mixed land use?:

If you wish to make any other relevant comments, please do so in the text box below.

Please add your comments here.:

## About you

What is your name?

Name:

[Redacted]

What is your email address?

Email:

[Redacted]

Are you responding as an individual or an organisation?

Individual

What is your organisation?

Organisation:

Scottish Forestry would like your permission to publish your response. Please indicate your publishing preference:

Publish response with name

We may share your response internally with other Scottish Forestry policy teams who may be addressing the issues you discuss. They may wish to contact you again in the future, but we require your permission to do so. Are you content for Scottish Forestry to contact you again in relation to this consultation exercise?

Yes

I confirm that I have read the privacy policy and consent to the data I provide being used as set out in the policy.
